LONG LIFE TAPER ROLLER BEARINGS

3 OUTSTANDING FEATURES

confirming *PFI – USA* the premium bearing for the Australian Automotive Aftermarket

1.

Forged Long Life Cup & Cone

All PFI bearings are manufactured from forged long life steel with heat treatment producing an exceptionally hi-load carrying bearing. This results in outstanding durability and long life.

2.

PRECISION MANUFACTURING

PFI bearings are manufactured to the highest and exacting technical specifications, equivalent to the original manufacturer's specs. Includes tolerance that is tighter than standard ISO bearing product.

- Quick, easy and consistent pinion preload setting
- Use the nominal spacer more frequently
- Reduced pinion spacer inventory and pinion assembly time = cost savings

3.

SPECIAL ROLLER & RACEWAY CROWNING FEATURES

PFI bearings include extra strengthening features ensuring they withstand the excessive stresses placed on these assemblies. A premium technical feature of PFI bearings to ensure long life.
